PANELS
Outdoor Kitchen

Composite panel outdoor kitchen with marble countertop, integrated Blaze grill and sink, 18Ga galvanized steel frame for long-term durability and premium outdoor living.

Composite panel outdoor kitchens offer complete design freedom without construction complexity. Shapes, colors, surface textures, and architectural rhythm are defined by your vision — not by material limitations.

Unlike stone installations, panel systems require no cement board, no mesh, and no wet work. Panels are installed directly onto a rigid steel frame, significantly reducing installation time, labor costs, and on-site risks. The process is clean, efficient, and highly predictable. This solution is ideal for those who value speed, precision, and contemporary aesthetics.

Straight layouts, L-shaped and U-shaped kitchens, islands, and bar configurations can all be executed with accuracy, while maintaining clean lines and structural stability. At the core of every kitchen is an engineered steel frame, designed to handle heavy loads and long-term outdoor exposure.

We integrate appliances from leading outdoor brands such as Hestia, Blaze, Kalamazoo, and others, tailoring each kitchen to real cooking habits, space requirements, and lifestyle needs. Panel kitchens are chosen by those who want control over timelines, budgets, and final results. No guesswork. No unnecessary construction layers. Just a modern, modular system where design flexibility, performance, and durability work together — exactly as planned.

STONE
Outdoor Kitchens

Stone outdoor kitchen with granite countertop, integrated Lynx grill and sink, 18Ga galvanized steel frame for long-term durability and premium outdoor living.

A stone outdoor kitchen is not just about appearance. It is an engineered system where mistakes made at the earliest stage inevitably reveal themselves over time — through cracks, delamination, shifting, and costly repairs.

At the core of every stone kitchen we build is a heavy-duty 18GA steel frame designed to handle extreme loads and harsh outdoor conditions. It safely supports the weight of natural stone, thick countertops, and built-in appliances without deformation or settlement. This structural backbone provides long-term stability, which is why we offer up to a 30-year warranty on the frame itself.

The system is completed with cement board, reinforced metal mesh, and only then — stone. This precise construction sequence ensures proper bonding, structural integrity, and durability for years to come. Every type of stone requires a unique approach. Natural or manufactured, large-format or modular — there is no one-size-fits-all solution. What matters is a properly engineered base, accurate load distribution design.

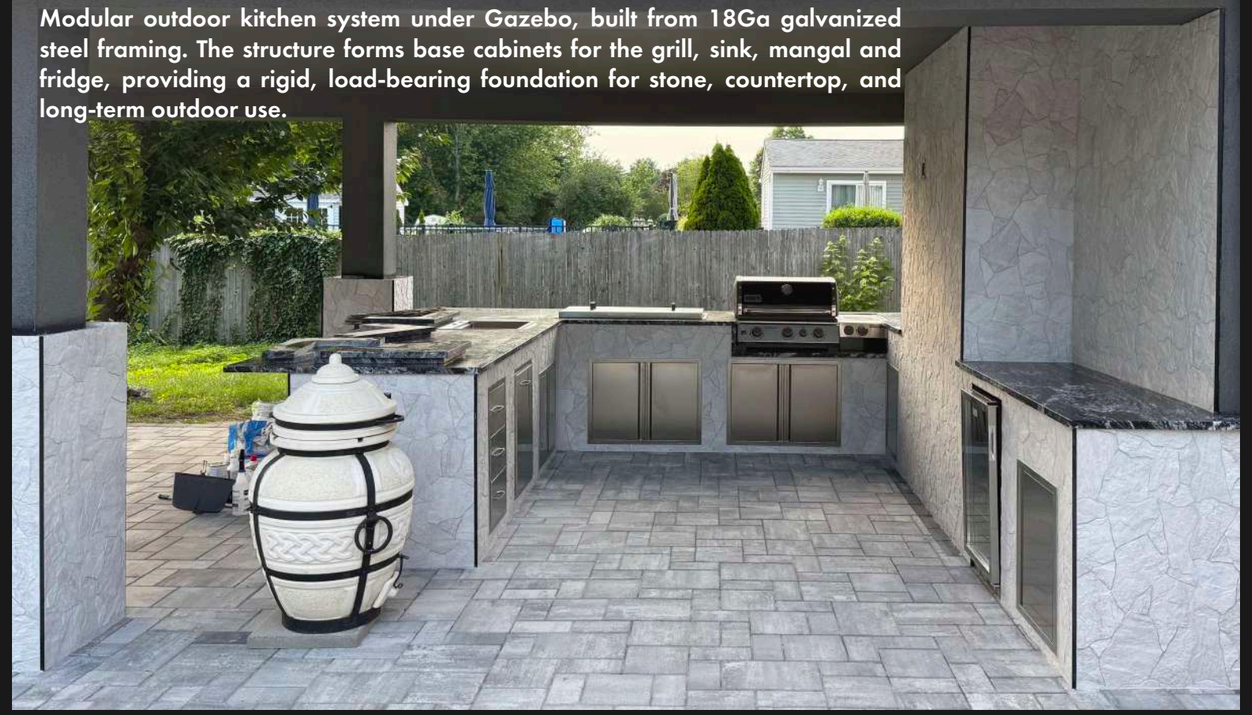
We address the real concern of homeowners, contractors, and landscape professionals: not how the kitchen looks on day one, but how it performs after years of use. Our stone outdoor kitchens are not a compromise between beauty and strength. They are architectural systems where aesthetics are fully supported by engineering.

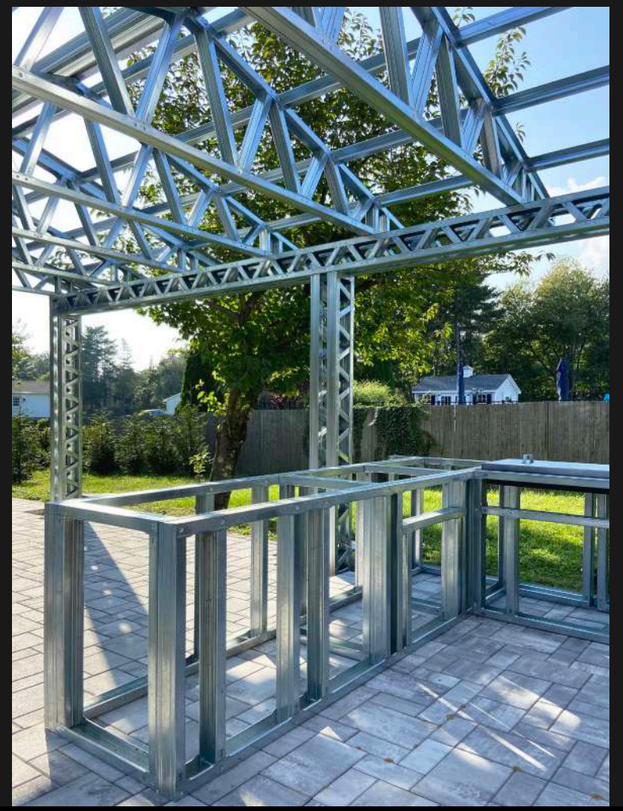
COLTS NECK

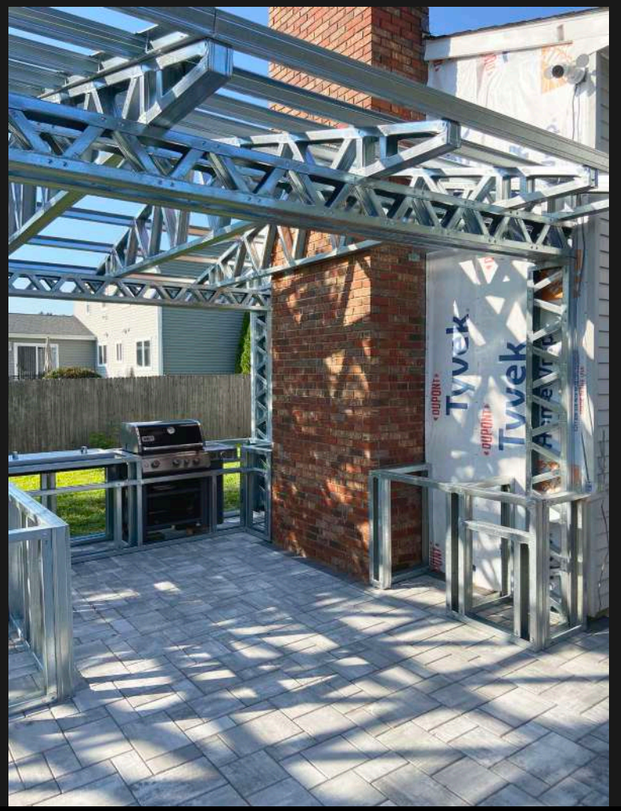
Outdoor Kitchen in NJ

The modular steel frame system simplifies outdoor kitchen construction by providing precise geometry, fast assembly, and predictable results. It reduces on-site labor, minimizes errors, supports heavy finishes and appliances, and allows flexible layouts with clean, efficient installation

Modular outdoor kitchen system under Gazebo, built from 18Ga galvanized steel framing. The structure forms base cabinets for the grill, sink, mangal and fridge, providing a rigid, load-bearing foundation for stone, countertop, and long-term outdoor use.







JACKSON

ECOLIT COSTRUCTION SYSTEM NYC INC.

ECOLIT is a global construction company that specializes in sustainable and environmentally friendly construction technologies, it was founded in 2008 and has offices in 10 countries around the world. The head office in the USA is located in New Jersey in Manalapan and 2 production facilities are located in California.

We use a proprietary **light gauge steel framing system** combined with a **lightweight foam concrete** that is poured into the steel frame walls and floors. We are a full-cycle company and have our own developments that allow us to construct buildings more efficiently than any other building technologies. Our system creates a monolithic, thermally efficient structure that is comparable to monolithic concrete, but is built quickly, like a Lego set.

ECOLIT's main advantages:

Speed: Faster construction but strong as reinforced concrete.
Durability: Long-lasting with low maintenance needs, **30 years warranty.**
Acoustic Insulation: High sound absorption for a quieter environment.
Design Flexibility: Allows for creative and complex architectural design.
Energy & Cost Efficiency: Excellent thermal insulation due to monolithic structure **R value 35**. Reduces energy consumption and costs through efficient construction processes.
Fire resistance: High fire resistance rating **up to 4 hours** in combination with light concrete.
Reduced Carbon Footprint: Use of renewable energy in steel production and efficient foam concrete.
Sustainable Practices: High recycled content, produced using eco-friendly methods, contributing to decarbonization goals.

OUTDOOR KITCHEN

METAL FRAME & READY-MADE ASSEMBLED KITCHEN ISLAND

Easy to assemble and install by yourself or with contractors, a **metal frame** for an outdoor kitchen, consisting of modules of all necessary **sizes from 24 inch to 48 inch**, and perfectly combined with any site, of any shapes and sizes.
The frame is made of galvanized steel, which provides a solid foundation and a long service life with a **30-year warranty**, regardless of operating conditions. Frame kits are packaged with all hardware required to assemble units quickly and easily, allowing you to create an outdoor kitchen of all sizes and shapes from compact rectangular modules to luxurious angular L - shaped and U - shaped shapes.

**** PERMITS ARE NOT REQUIRED UP TO 200 SQ. FT.***
**** INSTALLATION OF A FULLY FINISHED KITCHEN IN 1 DAYS.***
**** SEPARATE METAL FRAME FOR SELF-INSTALLATION IS AVAILABLE.***

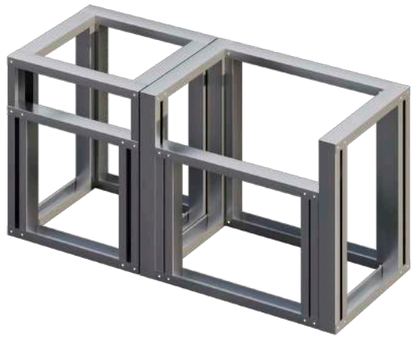
2 PIECE CABINET SET 75 IN



Set Includes:

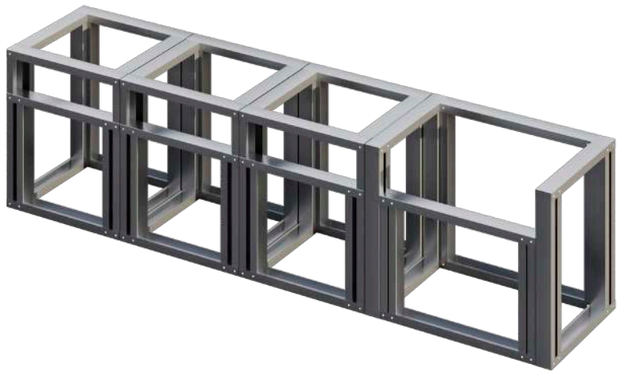
1 x Cabinet 31 | Door 22 x 22 in.
1 x Cabinet 44 Grill | Door 29 x 22 in.
Overall Set Dimension | 75 in. W x 28 in. D x 36 in. H
Frame | 18Ga Weather-resistant Galvanized Steel | Non-Combustible
Weight | 104 LB

3 PIECE CABINET SET 106 IN

Set Includes:

2 x Cabinet 31 | Door 22 x 22 in.
1 x Cabinet 44 Grill | Door 29 x 22 in.
Overall Set Dimension | 106 in. W x 28 in. D x 36 in. H
Frame | 18Ga Weather-resistant Galvanized Steel | Non-Combustible
Weight | 152 LB

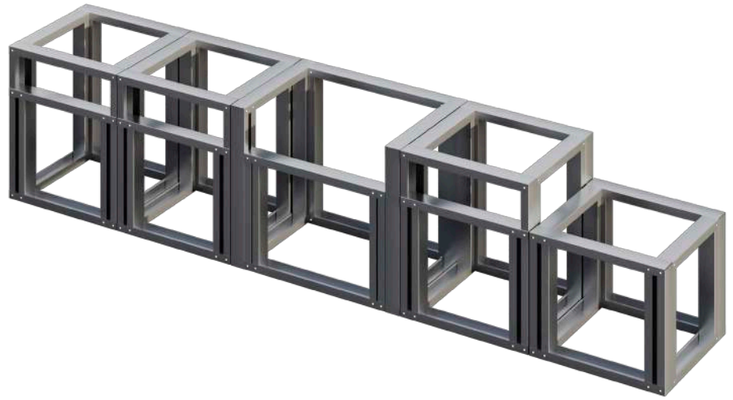
4 PIECE CABINET SET 130 IN



Set Includes:

1 x Cabinet 24 | Door 15 x 22 in.
2 x Cabinet 31 | Door 22 x 22 in.
1 x Cabinet 44 Grill | Door 29 x 22 in.
Overall Set Dimension | 130 in. W x 28 in. D x 36 in. H
Frame | 18Ga Weather-resistant Galvanized Steel | Non-Combustible
Weight | 197 LB

5 PIECE CABINET SET 158 IN



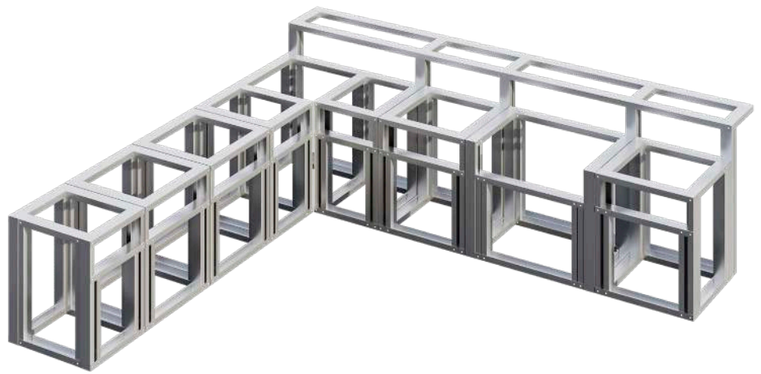
Pre-assembled metal frame cabinets set:

1 x Cabinet 28
1 x Cabinet 24 | Door 15 x 22 in.
2 x Cabinet 31 | Door 22 x 22 in.
1 x Cabinet 44 Grill | Door 29 x 22 in.
Overall Set Dimension | 158 in. W x 28in. D x 36 in. H
Frame | 18Ga Weather-resistant Galvanized Steel | Non-Combustible
Weight | 225 LB

We offer!
- *Full Manufacture Warranty!*
- *Same-Day Order Processing!*
- *All items, except custom-made products, will be shipped within 5 to 10 days!*

*Membership Save Up To 20% Off

9 PIECE CABINET SET 283 IN



Pre-assembled metal frame cabinets set:

1 x Bar Counter
3 x Cabinet 24 | Door 15 x 22 in.
2 x Cabinet 31 | Door 22 x 22 in.
2 x Cabinet 38 | Door 29 x 22 in.
1 x Cabinet 44 Grill | Door 29 x 22 in.
Overall Set Dimension | 283 in. W x 28in. D x 36 in. H
Frame | 18Ga Weather-resistant Galvanized Steel | Non-Combustible
Weight | 450 LB

We offer!
- *Full Manufacture Warranty!*
- *Same-Day Order Processing!*
- *All items, except custom-made products, will be shipped within 5 to 10 days!*

*Membership Save Up To 20% Off

2 PIECE CABINET SET 75 IN

Fully assembled cabinet with ready-made finishing materials

2 x Double doors
1 x Countertop | Built In Grill
1 x Cabinet 31
1 x Cabinet 44 Grill
Overall Set Dimension | 75 in. W x 28 in. D x 36 in. H
Frame | 18Ga Weather-resistant Galvanized Steel | Non-Combustible

We offer!
- *Full Manufacture Warranty!*
- *Same-Day Order Processing!*
- *All items, except custom-made products, will be shipped within 5 to 10 days!*

*Membership Save Up To 20% Off

3 PIECE CABINET SET01 106 IN

Fully assembled cabinet with ready-made finishing materials

3 x Double doors
1 x Countertop | Built In Grill
2 x Cabinet 31
1 x Cabinet 44 Grill
Overall Set Dimension | 106 in. W x 28in D x 36 in. H
Frame | 18Ga Weather-resistant Galvanized Steel | Non-Combustible

We offer!
- *Full Manufacture Warranty!*
- *Same-Day Order Processing!*
- *All items, except custom-made products, will be shipped within 5 to 10 days!*
